Project Report

On

"Travel And Tourism"

Submitted to

SHIVAJI UNIVERSITY, KOLHAPUR

In partial fulfillment of

B. Sc. COMPUTER SCIENCE (Optional)

Submitted by

Mr. Shivaji Sanjay Ajagekar
Mr. Shakshat Ramesh Chavan

Under the guidance of

Prof. I.P.Sutar

(M.C.M)

Through Principal,

Prof. Dr. S.M.Kadam

SHIVRAJ COLLEGE OF ARTS, COMMERCE &

D.S.KADAM SCIENCE COLLEGE, GADHINGLAJ

DIST. KOLHAPUR

2024-2025

K.V.R.S.S.S's
SHIVRAJ COLLEGE OF ARTS, COMMERCE &
D.S.KADAM SCIENCE COLLEGE, GADHINGLAJ
DIST. KOLHAPUR

CERTIFICATE

This is to certify that the project entitled, **"Travel And Tourism"** submitted by **Mr.Shivaji Sanjay Ajagekar** & **Mr. Shakshat Ramesh Chavan** to Shivaji University Kolhapur, in partial fulfillment of the degree of B.Sc.Computer Science has been carried out under the guidance and supervision of Prof.I.P.Sutar and the conclusion drawn by them during by them are based on work done and data collected by them during project work.

To the best of our knowledge and belief, the matter presented here has not been submitted earlier.

Date:
Place: Gadhinglaj

D.S.KADAM SCIENCE COLLEGE, GADHINGLAJ
DIST. KOLHAPUR

GUIDANCE CERTIFICATE

This is to certify that the project entitled "Travel And Tourism" conducted at Shivraj College Gadhinglaj by **Mr.Shivaji Sanjay Ajagekar** & **Mr. Shakshat Ramesh Chavan** .

In partial fulfillment of this work for award of B.Sc. Computer Science submitted to Shivaji University, Kolhapur has been completed under my supervision and guidance.

To the best of my knowledge and belief, the presented by them is original in nature and has not been from any source. In addition, this report has not been submitted earlier for ant degree or diploma of Shivaji University or any other university.

Place: Gadhinglaj.

Date:

Prof. I. P. Sutar

To

The Registrar, Shivaji

University, Kolhapur.

Subject:-Recommendation for B S c III Project. Respected Sir,

I, Dr. Kadam S . M . the principal of Shivraj College Gadhinglaj,

recommended that the following students,

Mr.Shivaji Sanjay Ajagekar

Mr. Shakshat Ramesh Chavan

Have completed the project report entitled, "Travel And Tourism". As per partial fulfillment according to the syllabus of the Shivaji University, Kolhapur under guidance of Prof. R.K.Patil .

Place : Gadhinglaj Dr.Kadam S.M

Date: Principal

Pawan Travels And Tourism

Tal : Ajara
Dist: Kolhapur
State: Maharashtra
Phone: 8530963933
Email: Pawantravels@gmail.com

CERTIFICATE

This is to certify that **Mr.Shivaji Sanjay Ajagekar** & **Mr. Shakshat Ramesh Chavan** of Shivraj College, Gadhinglaj have successfully completed their project in JAVA on our " **Travel And Tourism** ".

I wish them all good Wishes for their future ventures.

Date:

Place: Gadhinglaj

DECLARATION

We undersigned hereby declare that this report entitled "Travel And Tourism" for Shivraj College of Arts, Commerce and D.S. Kadam Science college , Gadhinglaj is our original work prepared under guidance of Prof. I. P. Sutar the empirical finding in this report are based on data collected by us . The matter presented is this report is not copied from any source.

We understand the copy is liable for punishment in any way the university Authorities deems to fit. This work has not been submitted to either Shivaji University or any other University.

This work is humbly submitted to Shivaji University, Kolhapur for the award of the degree of Bachelor of Computer Science (Optional)

Date:

Place: Gadhinglaj

Mr. Shivaji Sanjay Ajagekar

Mr. Shakshat Ramesh Chavan
(B.Sc. III Computer Science)

ACKNOWLEDGEMENT

It gives great pleasure to remain deeply indebted to our guide Prof. I. P. Sutar for providing us with the required facilities for the academic achievement. Under whom we had the privilege to work. The faith and Confidence shown by him in us boosted our moral and motivated us to perform better in preferring this project.

We are thankful to those who have contributed either directly or indirectly to this project.

Thanking You,

Mr. Shivaji Sanjay Ajagekar
Mr. Shakshat Ramesh Chavan
(B.Sc. III Computer Science)

INTRODUCTION

“Travel And Tourism”

The travel and tourism industry plays a pivotal role in the global economy, fostering cultural exchange and driving local development. As one of the largest sectors worldwide, it encompasses a diverse range of activities, from leisure and adventure travel to business tourism and cultural experiences. This project aims to explore the multifaceted nature of travel and tourism, examining its impacts on economies, societies, and the environment.

This project will delve into key trends, analyze the socio-economic benefits of tourism, and assess the challenges facing the industry today. By highlighting case studies from various regions, we aim to provide a comprehensive understanding of how travel and tourism can be leveraged for sustainable growth and community development.

ABOUT PROJECT

The project entitled **“Travel And Tourism”** for a software program. In the fast changing world. Information technology and information management are going to play an important role. We are living in the computer age during past some year. The computer has gaining popularity.

Computer revolution found its way into almost every aspect of human life and living. A computer is admirably suited to handle any information and hence is as information processor that is, it can receive data and perform some basic operation on that data and produces result according to a pre- determined program.

The Scope of this project is for the Travel And Tourism. We cannot use this Project for other System.

ORGANIZATION PROFILE

- Organization Name :- Pawan Travels And Tourism
- Venue :- Uttur
- Telephone No :- 8530963933
- Year of Establishment :- 2016
- Area of Work :- Uttur
- Owner of the Organization :- Mr. Sandesh Raykar.

EXISTING MANUAL SYSTEM

The existing manual system work as follows:-

- The present system is maintained manually.
- Existing manual system partly worked on register and here each record is written manually and consumes lot of time.
- All the calculation and work is done manually so the error rate is high.
- All works were done by workers and hence the profit rate was very low.
- Lots of errors occurred due to lack of better communication and understanding.
- The existing system is fully depended on manual works and hence if someone is not present then all system was collapsed.

LIMITATION OF EXISTING MANUAL SYSTEM

- Existing system is completely depending on manual work that is information stored in register and other books.

- In existing system more man power is required the information Stored is not accurate as well as there is various mistake in data filling process of system due to which storing the data was not accurate.

- To store large amount data, more stationary is required with increases the cost of stationary and hence lots of money and manpower was required.

- In existing system lots of time is spend on information storing in registers a managing mistakes.

- In an existing system, we cannot modify the records also we cannot backup of document.

- In an existing system all the works was done by only manpower and hence if the person is not present then the other work was got stopped due to which the system get stopped.

OBJECTIVES OF PROPOSED SYSTEM

- The basic objective of the proposed system is to develop the complete computerized application that can satisfy all the needs of the system.

- To overcome the drawback in manual system so that the proposed system can prove the greater with a higher speed as compared to the manual task.

- To develop a system which can keep track of distributed data related to a people.

METHODOLOGY

To design a computerized system be followed the software engineer approach. We have chosen classic life cycle approach for software development which is SDLC. This phenomenon includes system design, system Analysis and testing which is followed by again first phase i.e. repeating the cycle.

System design means understand the old system completely and planning the new system or to replace existing system.

Then we tell them that we are making project on Travel And Tourism . So they give us information like transaction, registers and required reports and over all process. They told us how the existing system is working.

After getting all needed information we make design of the Travel And Tourism as per we planned.

PROPOSED SYSTEM

There are several aspects where computerization scores over the manual system. Some of them are:-

- Searching any specific record becomes easier just enter unique id and you will get the corresponding information very faster.

- Computer are very accurate than man. Computer calculates anything without mistake.

- Using this system the users can book the events from home or any other area where the internet is present which help them by saving their money and time.

- One of the important features of the computer is its speed. It works very faster than man.

Due to computerization extra manpower for keeping records is not needed.

ADVANTAGES OF PROPOSED SYSTEM

- The full system is automatic and there is no need of human interaction for any calculation.

- The final reports of the system will be accurate and changing in the system database will be much easier.

- While generating the record proposed system auto generate all the important reports and saves the times.

- The software keeps the information out of the hands of unauthorized peoples and hence keeps the information secure.

SYSTEM ANALYSIS

SYSTEM DEVELOPMENT LIFE CYCLE

The process model used for this system “classic life cycle” as this is simple and is best for small scale project.

SYSTEM REQUIREMENT

To run the software we must have certain hardware & software installed on our computer. The minimum system requirements includes:-

- **Software Requirement:**
    - JAVA(Net beans IDE)
    - MySQL 5.5 or later
    - Glassfish Server.
    - Operating System:-Windows-8/ Windows-10/Windows-11 or above .

- **Hardware Requirement:**
    - Intel Dual Core i3/Ryzen3 or Higher Processor.
    - 8 GB of RAM or Above.
    - Minimum 500 GB Hard-Disk.
    - Computer, Keyboard and Mouse

- **Front End:**
    - JSP, SERVLET
    - JSP (HTML, CSS, JavaScript, Bootstrap).

- **Back End:**
    - MySQL Server.

About Java

ABOUT JAVA

Java general-purpose computer-programming language that is concurrent, class-based, object-oriented, and specifically designed to have as few implementation dependencies as possible. It is intended to let application developers "write once, run anywhere" (WORA), meaning that compiled Java code can run on all platforms that support Java without the need for recompilation.

Java applications are typically compiled to byte code that can run on any Java virtual machine (JVM) regardless of computer architecture. As of 2016, Java is one of the most use, particularly for client-server web applications, with a reported 9 million developers. Java was originally developed by James Gosling at Sun Microsystems(which has since been acquired by Oracle Corporation) and released in 1995 as a core component of Sun Microsystems' Java platform. The language derives much of its syntax from C and C++, but it has fewer low-level facilities than either of them.

The original and reference implementation Java compilers, virtual machines, and class libraries were originally released by Sun under proprietary licenses. As of May 2007, in compliance with the specifications of the Java Community Process, Sun relicensed most of its Java technologies under the GNU General Public License.

The latest version is Java 9, released on September 21, 2017 and is one of the two versions currently supported for free by Oracle. Versions earlier than Java 8 are supported by companies on a commercial basis; e.g. by Oracle back to Java 6 as of October 2017 (while they still "highly recommend that you uninstall" pre-Java 8 from at least Windows computers).

James Gosling, Mike Sheridan, and Patrick Naughton initiated the Java language project in June 1991.[24] Java was originally designed for interactive television, but it was too advanced for the digital cable television industry at the time. The language was initially called Oak after an oak tree that stood outside Gosling's office. Later the project went by the name Green and was finally renamed Java, from Java coffee. Gosling designed Java with a C/C++-style syntax that system and application programmers would find familiar.

There were five primary goals in the creation of the Java language:-

1. It must be "simple, object-oriented, and familiar".
2. It must be "robust and secure".
3. It must be "architecture-neutral and portable".
4. It must execute with "high performance".
5. It must be "interpreted, threaded, and dynamic".

About MySQL Database

WHAT IS DATABSASE

A database is a separate application that stores a collection of data. Each database has one or more distinct Application for creating, accessing managing, searching and replicating the data it holds.

Other kinds of data stores can be used such as files on the file system or large hash tables in memory but data fetching and writing would not be fast and easy with those types of systems.

So now days we use relational database management systems (RDBMS) TO store and manage huge volume of data. This is called relational database because all the data is stored into different bales and relations are established using primary keys or other keys known as foreign keys.

A RELATIONAL DATABASE MANAGEMENT SYSTEM (RDBMS)

- Enables you to implement a database with tables, columns and indexes.

- Guarantees the Referential Integrity between rows of various tables.

- Updates the indexes automatically.

- Interprets in a sql query and combines information from various tables.

MySQL DATABASE

MySQL is a leading open source database management system. It is a multi-user, multithreaded database management system. MySQL is especially popular on the web it is one of the parts of the very popular LAMP platform. Linux Apache, MySQL and PHP.

MySQL database is available on most important OS platforms. It run on BSD Unix, Linux, Windows or Mac. Wikipedia, you tube, Facebook use MySQL. These sites manage millions of queries each day .MySQL server software and the client libraries are dual-licensed GPL version 2 and proprietary license.

The development of MySQL begun in 1994 by a Swedish company MySQL AB in 2008 Sun was bought by oracle in 2010. MySQL PostgreSQL, Firebird, SQLite, Derby and HSQLDB are the most well-known open source database systems.

DATABASE DESIGN

➢ Table Description (ADMIN MODULE)

No.	Table Name	Description
1	Registration	This table contains details about Registration by Admin
2	Package Details	This table contains details of Package Details by Admin
3	Routs Details	This table contains details of Routs Details by Admin

Admin Module Database Design

1. Registration Table -

No	Field Name	Data type	Size	Constraint
1	Registration id	Int	-	Primary Key
2	User_name	Varchar	50	Not null
3	Contact_no	Bigint	10	Not null
4	Email	Varchar	50	Not null
5	Address	Nvarchar	200	Not null
6	Password	Nvarchar	10	Not null

2. Package Details -

No	Field Name	Data type	Size	Constraint
1	package_id	Int	-	Primary Key
2	package_name	varchar	100	Not null
3	Description	varchar	50	Not null
4	Duration	Int	9	Not null
5	Discount	Float	-	Not null
6	Amount	Float	-	Not null
7	Travel_date	date	-	Not null
8	Image	text	-	Not null
9	Routename	Varchar	50	Not null

3. Routs Details –

No	Field Name	Data type	Size	Constraint
1	Routs_id	Int	-	Primary Key
2	Routs_name	varchar	100	Not null
3	Start_Destination	varchar	100	Not null
4	To_Destination	Varchar	100	Not null
5	Vehicles	varchar	100	Not null

➢ Table Description (USER MODULE)

No.	Table Name	Description
1	Registration	This table contains user's details.
2	Enquiry	This table contains details of Enquiry by user.
3	Booking	This table contains details of Booking by user.
4	Payment Card	This table contains details of Payment Card by user.
5	Payment Upi	This table contains details of Payment Upi by user.
6	Cancel Booking	This table contains details of Cancel Booking by user.
7	Feedback	This table contains details of Feedback by user

➢ User Module Database Design

1. Registration Tabel :-

No	Field Name	Data type	Size	Constraint
1	Registration_id	Int	-	Primary Key
2	User_name	varchar	50	Not null
3	Contact_no	Bigint	10	Not null
4	Adderss	Varchar	200	Not null
5	Email	Varchar	50	Not null
6	Password	Varchar	10	Not null

2. Enquiry Tabel -

No	Field Name	Data type	Size	Constraint
1	enquiry_id	Int	-	Primary Key
2	Customer_name	varchar	100	Not null
3	Contact_no	Bigint	10	Not null
4	Email	Varchar	50	Not null
5	Route	Varchar	100	Not null
6	Travel_date	Date	-	Not null

3. Booking Tabel –

No	Field Name	Data type	Size	Constraint
1	Booking_id	Int	-	Primary Key
2	Customer_name	varchar	50	Not null
3	Contact_no	bigint	-	Not null
4	Email	varchar	30	Not null
5	Date	Date	30	Not null
6	Address	varchar	200	Not null
7	Package_name	varchar	50	Not null
8	Duration	int	10	Not null
9	Amount	float	-	Not null
10	Travel_date	Date	-	Not null

4.Payment UPI –

No	Field Name	Data type	Size	Constraint
1	Payment_id	Int	-	Primary Key
2	UPI_id	varchar	100	Not null
3	UPI_no	Int	-	Not null
4	Amount	Float	9	Not null

5.Payment Card -

No	Field Name	Data type	Size	Constraint
1	Customer_name	Varchar	100	Primary Key
2	Cno	Bigint	-	Not null
3	CVV	int	9	Not null
4	Amount	Float	-	Not null
5	Expiry_date	Date	-	Not null

6. Cancel Booking –

No	Field Name	Data type	Size	Constraint
1	cancel_id	Int	-	Primary Key
2	Customer_name	varchar	50	Not null
3	Cncel_date	Date	-	Not null
4	Amount	Float	-	Not null
5	Reason	Varchar	100	Not null
6	Status	varchar	100	Not null

7. Feedback Tabel -

No	Field Name	Data type	Size	Constraint
1	feedback_id	Int	-	Primary Key
2	Customer_name	varchar	100	Not null
3	Contact	Bigint	10	Not null
4	Email	Varchar	50	Not null
5	Date	Date	-	Not null
6	Meg	varchar	100	Not null

CONCLUSION

In conclusion, the travel and tourism project aims to enhance the overall travel experience by providing an accessible, user-friendly platform that prioritizes sustainability, personalization, and community engagement.

By integrating diverse services and promoting local destinations, the project not only supports travelers in making informed decisions but also fosters cultural exchange and economic growth in local communities.

Continuous monitoring and updates will ensure the platform evolves with user needs and industry trends, ultimately contributing to a responsible and enjoyable travel experience for all.
